

APPLICATION FOR CONSULAR ASSISTANCE

Due to the threat to the life of a Polish citizen of the European Union and a Cambodian citizen; I will request an investigation by Interpol from Indonesia and Malaysia in Cambodia, Siem Reap city on:

1. The theft of wedding money in the amount of \$3500 USD - the money came from Poland from the European Union.
2. Overstated sale price of house and land in the amount of \$5,000 USD (attachments)
3. a murder/poisoning probe involving shoving a very large amount of elephant feces into a water pump in a newly purchased house.

My request is motivated by the fact that the tourist and immigration police in Siem Reap City refused to investigate, despite the fact that a professional translator described everything in Khmer (enclosed in the envelope). I sent a letter in Khmer to the capital Phnom Peng, the headquarters of the immigration police, however, I received no response, as well as the translator who translated the letter into Khmer. After buying a house at an inflated price, someone broke into a private property at night and clogged the water pump with animal feces; this occurred after moving into the new house. The whole house stank and after a few days I was dizzy, my eyes swelled up and a piece of my tooth fell out. I reported it to the developer from whom I bought the house and land; however, despite the fact and he assured me that the neighborhood was safe, he did not report it to the police and said that the police would not do anything until there was video footage, so I installed CCTV cameras.

My ex-fiancée NISA IEM said that the money intended for the \$3500 USD wedding I gave for her mother was taken by "the people who organized the engagement" in Nisa's village and spent it on alcohol and food. Nisa was intimidated "if I live with you then the people who go to the pagoda will do bad things to me and you and poison us." I said for Nisa that if we are afraid to live in our own home in Cambodia; then we can go to Bangkok, Thailand, because I have my own apartment there, where there is 24-hour security and cameras, she replied with Buddhist monks will find us even a Bangkok.

That is why I am sending this letter from a country where Buddhists are a minority. I will ask for help in sending Interpol police officers from Malaysia and Indonesia; because there is a possibility that people affiliated with Buddhism tried to poison/poison me. The person, a Cambodian national, who defrauded me of \$5,000 (Dohn Lee) regularly travels to Bangkok and buys brakes for motorcycles, which he later sells in Cambodia, boasted that he has connections in Bangkok. Siem Reap City is ruled by a military mafia that collects ransoms from all business owners, the police are unable to do anything without the permission of the military.

The person from whom I bought the land and house (Yim prosyat) boasted that he had family in the military.

After I bought the house, the owner of the POWER real estate company was so brazen that he didn't even put my phone number (only his) on the electricity bill and I couldn't pay for the electricity in the house I bought (attachment).

28/12/2023 NISA IEM was supposed to go to the Siem Reap city Landing Department Office to secure a loan agreement for a house and land, but was reportedly hospitalized. On the TELEGRAM mobile app, she posted a photo of her hand with a syringe in a short video from a room that does not resemble a hospital at all. It seems to me that this was staged by the people who tried to poison me in my newly bought house. It seems to me that this is a well-organized criminal group that specializes in poisoning tourists from all over the world. And my investigation can be linked to a large number of poisonings of tourists from the European Union, America, the US and Australia.

Therefore, I will ask for help to delegate Interpol agents challenge Islam, to rule out local religious ties; to Siem Reap City to professionally investigate the attempted murder (involving poisoning) of a Polish, European Union citizen.

The investigation should start by checking Nisa IEM's medical records from 28/12/2023 (why she was hospitalized, which hospital, how long she was in the hospital, what injection she got, etc.) and checking the communications from the Telegram and WhatsApp apps of the suspects who stole the wedding money.

While working in the European Union for the Mercurius transport company, Mariusz Wladyczanski said that Cambodian nationals are smuggled across Poland's eastern borders to Benelux and then to the US. Therefore, it seems to me that these could be people linked to intercontinental human smuggling. Therefore, checking the communication channels of these people may be crucial for other cases not in Asia but in Europe and America.

Due to the fact that DANTIH the person in charge of registering the loan agreement at the Landing Department Office in Siem Reap City Council changed his profile picture in the TELEGRAM application and wrote me a message that Nisa will not come on 28/12/2023 a few days before he goes to the hospital. The loan agreement was not registered, so I think the person who wanted to poison me, kill me got the information from the landing department office in Siem Reap.

For this reason, it seems to me that someone who has kidnapped me and is directing this organized plot to steal tourists' money will force Nisa to sell the house and land at an undervalued price. I would like to remind you that the money for the purchase of the house and land came from the inheritance of my father Dr. Michal Lisowski (attachment), that is from the European Union and not from Cambodia, so I am turning to the embassies of many countries not only Poland.

After installing HIK CONNECT 6 cameras, which film the entrance to the house and the water pump, I noticed that the cameras did not record several events such as the person who put the bottle located on the wall and the person who took the plastic bottle from the backyard. It seems to me that the people who organized my poisoning have access to change

livestream from HK cameras. Only professional criminal groups affiliated with the police and military have access to such technology.

Nisa's uncle works at Siem Reap Airport in the lost property department. During an engagement party, he said he was in the military, and I spoke with him for a few moments. After returning to Bangkok, I wrote him an email, and then my email was blocked by Siem Reap Airport.

In this regard, I will ask for help:

1. In the delegation of Interpol from Malaysia and Indonesia to Siem Reap City.
2. in a request to the International Monetary Fund to revoke the land deal (appendix) due to life-threatening risks.
3. returning \$60000 USD to Millennium Bank accounts due to threats to life and the Cambodian government's refusal to investigate.
4. Help with a remote (long-distance) court case in Siem Reap and the opportunity to testify in Bangkok, as I currently live in the Thai capital and am afraid to return to Siem Reap because the Police ignore my testimony and defend the robbers.
